

Amendments to the Claims

Please amend the listing of claims as follows:

1. (Currently Amended) A gearbox Gearbox drive unit (1), especially for adjusting movable parts in a motor vehicle, comprising at least one housing part (2) and at least one fixing dome (6, 7, 8, 9), which is used to secure the gearbox drive unit (1), characterized in that the housing part (2) comprises a first connection location point (45) and at least one other second connection location point (46), whereon the fixing dome (6, 7, 8, 9) can be is configured to be placed, and that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) at either the first connection location point (45) or at the second connection location point (46) according to a screw layout image for fixation of the gearbox drive unit (1), characterized in that the fixing dome (6, 7, 8, 9) includes a projection (20), which engages in a groove (21) in the housing part (2) of the gearbox drive unit (1) in order to create the connection between the fixing dome (6, 7, 8, 9) and the housing part (2), characterized in that the fixing dome (6, 7, 8, 9) is fixed to a structure.
2. (Canceled)
3. (Withdrawn) Gearbox drive unit according to Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a dovetail connection.
4. (Previously Presented) Gearbox drive unit according to Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a welded connection (22).
5. (Withdrawn) Gearbox drive unit according to Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a screw connection.

6. (Currently Amended) Gearbox drive unit according to Claim 1, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of first and second connection locations points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) ~~can be~~ are configured to be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection locations points (45, 46), whereby the selected connection locations points (45, 46) are selected according to the screw layout image for fixation of the gearbox drive unit (1).
7. (Previously Presented) Gearbox drive unit according to Claim 1, characterized in that at least one other fixing dome (6, 7, 8) is provided and that the fixing dome (6, 7, 8) and the other fixing dome (6, 7, 8) have a common base body (40) so that ~~they the fixing dome (6, 7, 8) and the other fixing dome (6, 7, 8) are configured to be~~ can be connected jointly to the housing part (2).
8. (Currently Amended) Gearbox drive unit according to Claim 7, characterized in that the housing part (2) has, at least in sections, a circular ring-shaped section (5), that the common base body (40) of the fixing dome (6, 7, 8) and of the other fixing dome (6, 7, 8) partially surrounds the circular ring-shaped section (5) and are configured to be ~~can be~~ connected at the first (45) and the second connection locations points (46) with the circular ring-shaped section (5).
9. (Amended and Withdrawn) Gearbox drive unit according to Claim 2 Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a welded connection (22).
10. (Withdrawn) Gearbox drive unit according to Claim 3, characterized in that the fixing dome (6, 7, 8, 9) is connected to the housing part (2) of the gearbox drive unit (1) by means of a welded connection (22).

11. (Amended and Withdrawn) Gearbox drive unit according to Claim 2 Claim 1, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection locations points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) ~~can be~~ are configured to be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection locations points (45, 46), whereby the selected connection locations points (45, 46) are selected according to the screw layout image for fixation of the gearbox drive unit (1).
12. (Amended and Withdrawn) Gearbox drive unit according to Claim 3, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection locations points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) ~~can be~~ are configured to be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection locations points (45, 46), whereby the selected connection locations points (45, 46) are selected according to the screw layout image for fixation of the gearbox drive unit (1).
13. (Amended and Withdrawn) Gearbox drive unit according to Claim 4, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection locations points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) ~~can be~~ are configured to be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection locations points (45, 46), whereby the selected connection locations points (45, 46) are selected according to the screw layout image for fixation of the gearbox drive unit (1).

14. (Amended and Withdrawn) Gearbox drive unit according to Claim 5, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection locations points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) ~~can be~~ are configured to be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection locations points (45, 46), whereby the selected connection locations points (45, 46) are selected according to the screw layout image for fixation of the gearbox drive unit (1).

15. (Amended and Withdrawn) Gearbox drive unit according to Claim 9, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection locations points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) ~~can be~~ are configured to be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection locations points (45, 46), whereby the selected connection locations points (45, 46) are selected according to the screw layout image for fixation of the gearbox drive unit (1).

16. (Amended and Withdrawn) Gearbox drive unit according to Claim 10, characterized in that the gearbox drive unit (1) includes several fixing domes (6, 7, 8, 9) of the same type, that a plurality of connection locations points (45, 46) are provided on the housing part of the gearbox drive unit (1), whereon the fixing domes (6, 7, 8, 9) ~~can be~~ are configured to be placed, that the fixing domes (6, 7, 8, 9) are connected to the housing part (2) at selected connection locations points (45, 46), whereby the selected connection locations points (45, 46) are selected according to the screw layout image for fixation of the gearbox drive unit (1).

17. (New) Gearbox drive unit according to Claim 1, characterized in that the structure is a motor vehicle body.

18. (New) Gearbox drive unit according to Claim 1, characterized in that the fixing dome (6, 7, 8, 9) is arranged such that the fixing dome (6, 7, 8, 9) is slideable along a circumference (15) or an edge (16, 17) of a housing part.
